EXPERIENCE

USER EXPERIENCE (UX) DESIGN STUDENT

Est. January 2024

Virtual Learning

- Design human-system interfaces using an iterative, human-centered design approach.
- Create the product's information architecture and low – high fidelity wireframes based on user research and analysis.
- Improve designs by implementing user interface (UI) design principles and emotional design for user engagement.
- Ready design documentation for team collaboration or developer handoff.

PEDIATRIC OCCUPATIONAL THERAPIST

2020 - Present

The Children's Therapy Center, Inc. • Webster, TX

- Provide client-centered, evidence-based intervention, and treatment for children and individuals (ages 0-19) with varying physical, psychosocial, and developmental differences.
- Educate parents and caregivers via home programs to increase carryover of motor skills, executive functioning, and social skills in the home, school, and community environments.
- Adapt and modify tasks and environments to facilitate optimal functioning and meet individual and family needs.
- Evaluate individuals, create treatment plans, document continuum of care using electronic medical records (EMR), and update and re-evaluate plan of care bi-annually.
- Demonstrate varying levels of communication to meet the needs of the individual, family members, and the multi-disciplinary team.

PEDIATRIC OCCUPATIONAL THERAPIST

2019 - 2020

Believe Therapies, LLC • Bryan, TX, and Huntsville, TX

- Evaluate and treat clients (children and adults) with varying physical, psychosocial, and/or cognitive challenges in an outpatient clinical setting.
- Design treatment plans, document progress, and update plans of care.

LEVEL II CLINICAL FIELDWORK

2018

Oregon State Hospital • Salem, OR

- Lead occupation-based group therapy interventions for incarcerated clients with varying psychiatric needs.
- Determine environmental and task modifications needed to support client transition from the hospital to community setting.

LEVEL II CLINICAL FIELDWORK

2018

TIRR Memorial Hermann • Houston, TX

- Provide coordinated care and intervention to adults with brain or spinal cord injuries in an outpatient setting.
- Restore independence with daily activities during individual treatment sessions or through group intervention via weekly community outings.
